

Exhibit A

**UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF NEW YORK**

SECURITIES AND EXCHANGE COMMISSION,

Plaintiff,

v.

RIPPLE LABS, INC., BRADLEY GARLINGHOUSE, and
CHRISTIAN A. LARSEN,

Defendants.

**20-cv-10832 (AT) (SN)
(S.N.D.Y.)**

SUPPLEMENTAL DECLARATION OF JOHN E. DEATON

I, John E. Deaton, hereby declare under penalty of perjury to 28 U.S.C. §1746 that the following is true and correct:

1. On May 20, 2022, I, John E. Deaton, signed a declaration regarding the creation and collection of Affidavits signed by XRP Holders from the United States and abroad.
2. The May 20, 2022 Declaration is incorporated herein by reference and is attached as **Exhibit A**.
3. The May 20, 2022 Declaration is accurate regarding the information contained therein. I offer this Supplemental Declaration, adding additional and more complete information regarding the DVD containing 3,252 Affidavits, previously sent to counsel representing the Securities and Exchange Commission (SEC) and counsel for the Defense.
4. Attached, as **Exhibit B**, is a printout of the analytics related to the Affidavit Email, sent by the Deaton Law Firm (DLF), to XRP Holders containing the proposed XRP Holder Affidavits, along with instructions and guidelines pertaining thereto.
5. Of the 11,052 Affidavit emails, 111 “bounced” meaning, undelivered. Thus, of the 11,052 Affidavit emails, 10,941 were considered “successfully delivered.” See **Exhibit B**.

6. Of the 10,941 successfully delivered emails, 2,917 were never opened by the XRP Holder recipients. *See Exhibit B.*
7. Therefore, of the 10,941 successfully delivered emails, 8,024 Affidavit emails were opened by XRP Holder recipients. *See Exhibit B.*
8. Of the 8,024 XRP Holders who opened the Affidavit email, 13 recipient XRP Holders unsubscribed from receiving further email correspondence. *See Exhibit B.*
9. Of the 8,024 XRP Holders who opened the Affidavit email, 5,131 XRP holders clicked the links within the Affidavit email, containing the instructions and proposed Affidavits. *See Exhibit B.*
10. Accordingly, 73.3% of the XRP Holders who were successfully delivered the Affidavit email, opened the email. *See Exhibit B.*
11. Accordingly, 46.9% of the XRP Holders who were sent the Affidavit email, clicked the links within the email, containing the instructions and proposed Affidavits. *See Exhibit B.*
12. I have personally spoken to hundreds of XRP Holders. I have communicated via email, and through social media with thousands of XRP Holders. Through these communications, I have learned that the Affidavit email, originally sent, was not actually received by hundreds of XRP Holders because it was actually delivered to their spam folder, although it is listed, in **Exhibit B**, as successfully delivered. Hundreds of XRP Holders also communicated that they ultimately chose to not participate, by signing an Affidavit, out of fear of retaliation from the SEC. Many XRP Holders have also communicated that they didn't respond to the Affidavit email because it was rumored that the XRP Holder email list, maintained by the DLF, was hacked and anyone receiving an email with a link should not click a link because it would unleash a virus or copy private information including

passwords thus, risking banking information and risking losing digital assets.

13. The May 20, 2022 Declaration indicates counsel for the SEC and counsel for the Defense were delivered a DVD containing 3,252 Affidavits. These Affidavits were submitted to the DLF directly from XRP Holders as of May 20, 2022. Please be advised that when the Affidavits were downloaded onto a DVD, an error occurred during the downloading process and 33 of the exact same Affidavits, from 16 Affiants, were downloaded onto the DVD and counted twice. Therefore, those 33 duplicate Affidavits should be subtracted from the 3,252 total, referenced in the May 20, 2022 Declaration. An additional error that occurred is several of the downloaded PDFs contained more than one Affidavit. Specifically, two (2) of the downloaded PDFs, from two (2) Affiant XRP Holders, contained three (3) additional Affidavits. Those three Affidavits were not included in the 3,252 total, referenced in the May 20, 2022 Declaration. After correcting these tabulation and downloading errors, there are 3,222 non-duplicative XRP Holder Affidavits, signed by 1,746 XRP Holders, contained within the DVD, submitted to the parties on May 20, 2022.
14. Of the 3,222 non-duplicative XRP Holder Affidavits, signed by 1,746 XRP Holders, contained in the DVD, submitted to the parties on May 20, 2022, there are: 939 Category 1A Affidavits; 675 Category 1B Affidavits; 389 Category 2A Affidavits; 353 Category 2B Affidavits; 59 Category 3 Affidavits; 196 Category 4A Affidavits; 138 Category 4B Affidavits; 132 Category 5 Affidavits; and 341 Category 6 Affidavits.
15. Although the DLF was aware of a few issues involving a very minor number of Affidavits, for the sake of transparency, integrity and completeness, the DLF did not withhold any Affidavits. All received Affidavits, as of May 20, 2022, were submitted to the parties. In sum, the DLF provided the parties with all the Affidavits submitted to the DLF from around

the globe, without alteration, deletion, or modification of any kind. Now that the parties have received all of the Affidavits (received by the DLF as of May 20, 2022), I offer the following supplemental information:

- a. There are twenty-seven (27) XRP Holders who signed both a 1A and 1B Affidavit, providing two different dates regarding their first purchase of XRP. Because both Category 1A and Category 1B list the first time of purchase, and these 27 Affiants included two separate dates, the DLF contacted the Affiants in an attempt to seek clarification. Twenty-one (21) of these 27 Affiants have provided Supplemental Affidavits explaining why they signed both 1A and 1B Affidavits. The Supplemental Affidavits are attached as **Exhibit C**. In sum, these 21 Affiant XRP Holders explain that they signed both Category 1A and Category 1B Affidavits because they believe both Affidavits are applicable to their purchases of XRP - at different times. These 21 Affiants explain that the very first time they purchased XRP they were completely unaware of a company called Ripple. *See Exhibit C*. Hence, their 1A Affidavits are accurate. These 21 Affiants explain that they made a subsequent purchase of XRP after obtaining knowledge regarding the existence of a company called Ripple. Thus, the 21 Affiants signed both Affidavits because they believed they were being asked to state when they acquired XRP without knowledge (of Ripple) but also if they acquired XRP with knowledge (of Ripple). *See Exhibit C*. These 21 Affiants explain that because the Affidavits are under oath they felt compelled to sign both Affidavits describing their different purchases at different times with different levels of knowledge (including no knowledge) regarding the

company Ripple. *See Exhibit C.* Two (2) of the twenty-seven (27) XRP Holders who signed both a 1A and 1B Affidavit, providing two different dates regarding the first purchase of XRP, instructed the DLF, via email, to only submit their 1B Affidavit because that is the Affidavit most accurate. *See Exhibit D.* Four (4) of the 27 Affiants that signed both a 1A and 1B Affidavit, providing two different dates regarding their first purchase of XRP, have not yet responded to the DLF follow-up email, as of the date of this Supplemental Declaration, by John E. Deaton.

- b. There are fourteen (14) XRP Holders who signed both a 1A and 1B Affidavit, providing the same date regarding their first purchase of XRP. The DLF contacted the Affiants seeking clarification. All fourteen (14) Affiant XRP Holders responded with clarifications as to which Affidavit should be used. Two (2) Affiants signed a Supplemental Affidavit stating 1A is most accurate and explained that they signed both Affidavits because they were aware of the name Ripple but unaware of a company called Ripple. They signed both Affidavits because the Affidavits state the Affidavits are under oath and they were honoring said oath. *See Exhibit E.* Eleven (11) of the fourteen (14) Affiants instructed the DLF, via email, to use Affidavit 1A. *See Exhibit F.* One (1) Affiant instructed the DLF, via email, to use Affidavit 1B. **Exhibit G.**
- c. There are six (6) Affiant XRP Holders who signed both a 2A and 2B Affidavit, providing two different dates regarding their first purchase of XRP. Because both Category 2A and Category 2B list the first time of purchase, and these 6 Affiants included two separate dates, the DLF contacted the Affiants seeking

clarification. Three (3) of these Affiants provided Supplemental Affidavits explaining why they signed both a 2A and 2B Affidavit. *See Exhibit H.* In sum, these 3 Affiant XRP Holders explain that they signed both Category 2A and Category 2B Affidavits because they believed both Affidavits are applicable to their purchases of XRP, at different times. These 3 Affiants explain that the very first time they purchased XRP they were completely unaware of a company called Ripple. *See Exhibit H.* Thus, their 2A Affidavits are accurate. These 3 Affiants explain in their Supplemental Affidavits that they made a subsequent purchase of XRP after obtaining knowledge regarding the existence of a company called Ripple. Therefore, the 3 Affiants signed both Affidavits because they believed they were being asked both to state when they acquired XRP without knowledge (of Ripple) and when they acquired XRP with knowledge (of Ripple). *See Exhibit H.* These 3 Affiants explain that because the Affidavits are under oath they felt compelled to sign both Affidavits describing their different purchases at different times with different levels of knowledge (including no knowledge) regarding the company Ripple. *See Exhibit H.* Two (2) of the six (6) Affiants instructed the DLF, via email, to submit and rely on their Affidavit 2B. *See Exhibit I.* One (1) Affiant instructed the DLF, via email, to submit and rely on his Affidavit 2A. *See Exhibit J.*

- d. There are eight (8) people who signed both a 2A and 2B Affidavit, providing the same date regarding their first purchase of XRP. The DLF contacted the Affiants seeking clarification. All eight (8) Affiants responded with clarification as to which Affidavit should be used. Six (6) Affiants instructed

the DLF, via email, to use Affidavit 2A. *See Exhibit K.* One (1) Affiant provided a Supplemental Affidavit stating Affidavit 2A is most accurate and explained that she signed both Affidavits because she was aware of the name Ripple but unaware of a company called Ripple. *See Exhibit L.* She signed both Affidavits because the Affidavit states it is made under oath and she was honoring said oath. *See Exhibit L.* One (1) Affiant provided clarification, via email, withdrawing the 2A and 2B Affidavits, requesting the DLF to submit only his 1A Affidavit. *See Exhibit M.*

- e. One (1) Affiant XRP Holder submitted two (2) Affidavits in which he placed a “N/A” over certain paragraphs. The DLF believes “N/A” stands for “Not Applicable”, which would, therefore, omit those paragraphs from the Affidavit. Although I believe the two Affidavits should not be relied upon or considered, as sated, I chose to include them for the sake of transparency, integrity and completeness. I leave it to the parties to decide whether to include them for consideration.
- f. There are fourteen (14) Affidavits from Eleven (11) XRP Holder Affiants whose Affidavits are not completely filled in - meaning one or more blank fields on the Affidavit was left blank. Specifically, seven (7) Affidavits did not include a date of acquisition; five (5) Affidavits are missing the date of signing; one (1) Affidavit is missing the Affiant’s address; and, one (1) did not include the date of acquisition, date of signing, or the signature. With the exception of the one affidavit that does not include a signature, I believe the other 13 Affidavits should be considered and relied upon. However, that determination

is for the parties to decide. Again, the DLF provided the parties with all of the Affidavits received and chose not to hold any back or cherry-pick which Affidavits to submit.

- g. One Affiant XRP Holder signed Affidavits 1B, 2A, 2B, and 4A inserting different dates related to the first-time acquisition of XRP. The DLF reached out to the Affiant for clarification. He informed the DLF, via email, to disregard Category 2B and explained that he believed the Affidavits were applicable because he made purchases of XRP using different digital wallets. *See Exhibit N.* Hence, the first time he purchased XRP with each digital wallet explains why he signed the Affidavits accordingly. *See Exhibit N.*
- h. On May 20, 2022, during the downloading process, one Category 1B Affidavit was encrypted or damaged somehow. With the exception of the signature, the Affidavit became unreadable when downloaded. I have attached a readable copy of said Affidavit. *See Exhibit O.*

16. Once again, I included all the Affidavits submitted to the DLF (as of May 20, 2022). I did this for reasons of veracity, truthfulness completeness and reliability. In short, I didn't cherry-pick Affidavits and I instructed my staff to provide the parties with everything. Quite frankly, when dealing with several thousand Affidavits from over seventeen-hundred different Affiants, from around the globe, if there weren't some minor issues, the process would seem suspect. Regardless, the minor discrepancies involved in the creation and collection of the XRP Holder Affidavits is equal to substantially less than one-percent of the submitted Affidavits. I have provided the parties with the exact communications between the DLF and XRP Holders. By providing the parties with everything associated

with the creation and collection of the Affidavits, the parties can fully evaluate the veracity, credibility and reliability of the Affidavits. The Supplemental Affidavits contained in **Exhibit C, Exhibit H, Exhibit E** and **Exhibit L** demonstrate how the Affiant XRP Holders took the oath serious (even if the Affidavit wasn't notarized). It is evident from the Affidavits themselves, as well as my communications with XRP Holders, that the majority of first time acquirers of XRP were completely unaware of a company called Ripple.

17. Through communications with XRP Holders, I have learned that some XRP Holders acquired XRP for the first time after the date of the filing of the SEC's lawsuit against Ripple and still lacked any knowledge or awareness of the company Ripple. There will be people who acquire XRP many months from today's date and will have never heard of the company Ripple or be aware of this lawsuit. The truth is the majority of people who acquired XRP were unaware of the company Ripple. In fact, many XRP Holders have learned about the company Ripple only because of the SEC's lawsuit. **See Exhibit F.** Many XRP Holders, especially international XRP Holders, are still unaware of the lawsuit and unaware of Ripple today. Evidence of this fact is that the putative class of XRP Holders continues to grow daily. Currently, as of June 6, 2022, there are 67,712 XRP Holders who have joined in a putative class sharing the same interests as amici.

18. The DLF continues to receive Affidavits from XRP Holders each week.

19. In fact, between May 20, 2022 and June 3, 2022, the DLF received an additional 247 Affidavits from 141 Affiant XRP Holders. The DLF has made the additional 247 Affidavits electronically available to the parties via a DropBox link on June 6, 2022.

Executed on June 6, 2022, in East Providence, Rhode Island.

Respectfully Submitted,

A handwritten signature in black ink, appearing to read "John E. Deaton". The signature is stylized, with the first name "John" written in a cursive-like script, followed by "E." and a large, bold "D" that extends into a long horizontal stroke.

John E. Deaton
